I. Screenshot of all working Frontend pages

A. index.html

ANNOTATION:

The Homepage serves as the main landing page of the system. It provides navigation to other pages such as login and register. This page supports the general system access use case and allows users to explore the system before logging in.

B. login.html

Smart Attendance

Sign in to continue

ID Number

2023001

Password

Login

[Don't have an account? Register here](#)

Demo: Student 2023001 • Teacher TEACHER01

ANNOTATION:

The Login Page allows users to enter their ID number and password to access their account. This page supports the "User Login" use case. The input fields correspond to the User entity in the ERD, specifically the email and password attributes.

C. register.html

Smart Attendance

Create your account

Full Name

ID Number

2023001 (Student) or TEACHER01

Email

Password

Role

Student

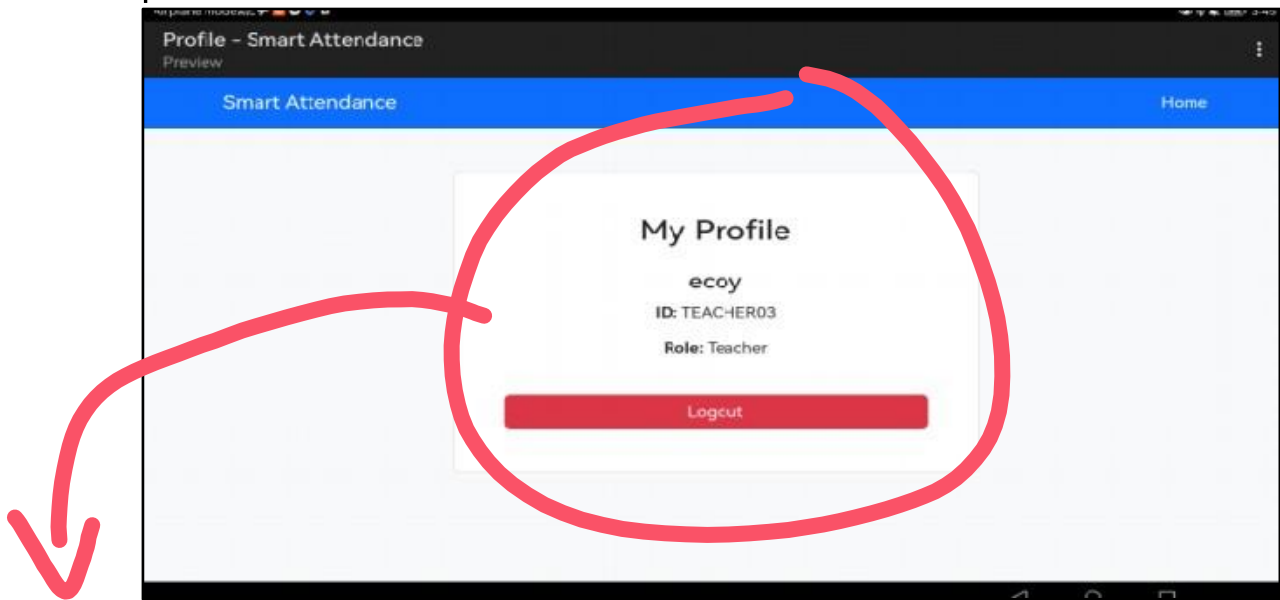

Create Account

ANNOTATION:

The Register Page allows new users to create an account. It includes fields such as name, ID number, email, password, and role which are based on the User entity in the ERD. This page supports the "User Registration" use case.

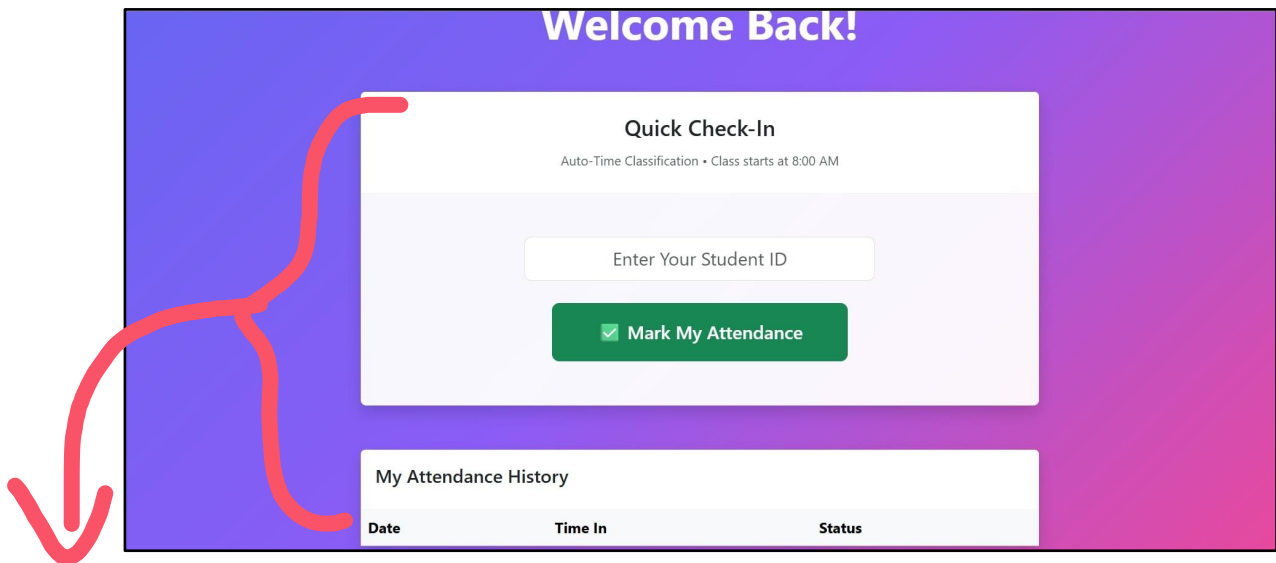

D. profile.html

ANNOTATION:

The Profile Page displays the user's personal information. This page supports the "View Profile" use case. The displayed data corresponds to the fields defined in the User entity in the ERD.

E. student-dashboard.html

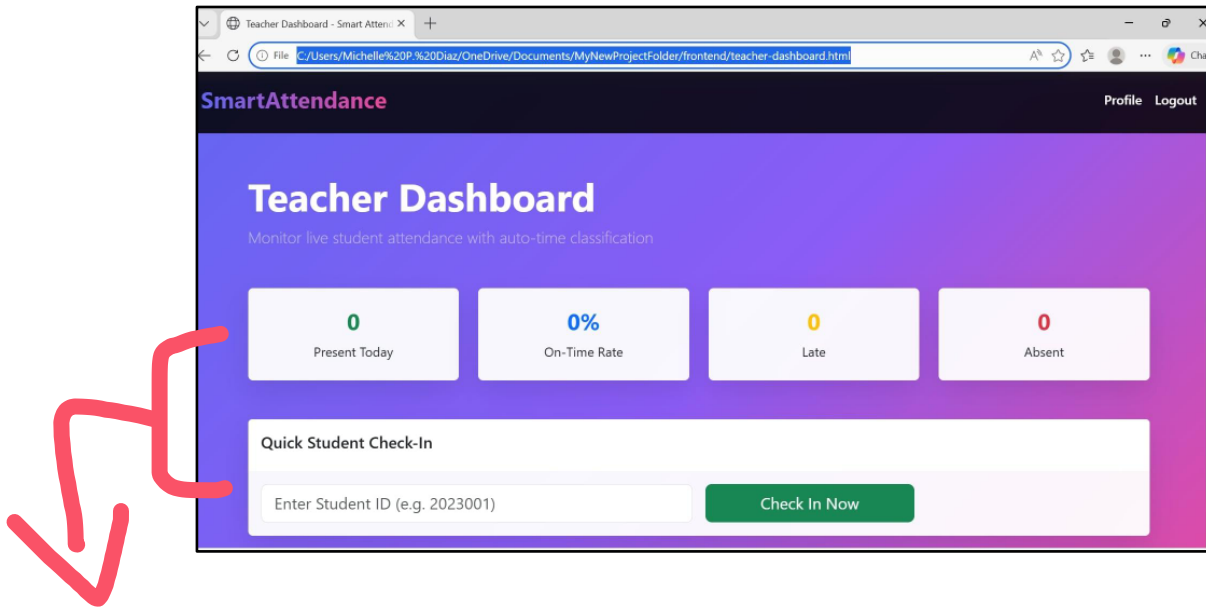

ANNOTATION:

The Student Dashboard provides an interface for student users after logging in. It displays relevant information and system features available to students. This page supports the "View Dashboard" use case for students.

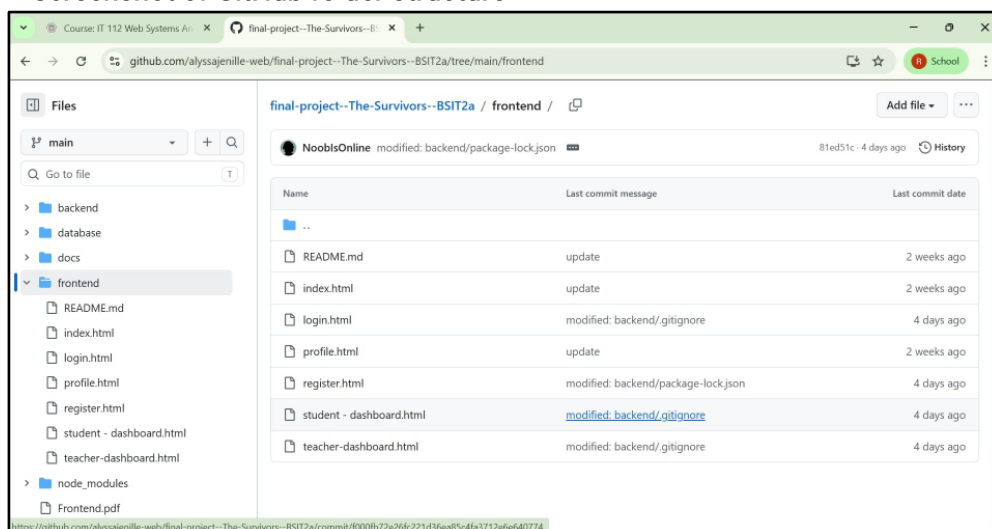

F. teacher-dashboard.html

ANNOTATION:

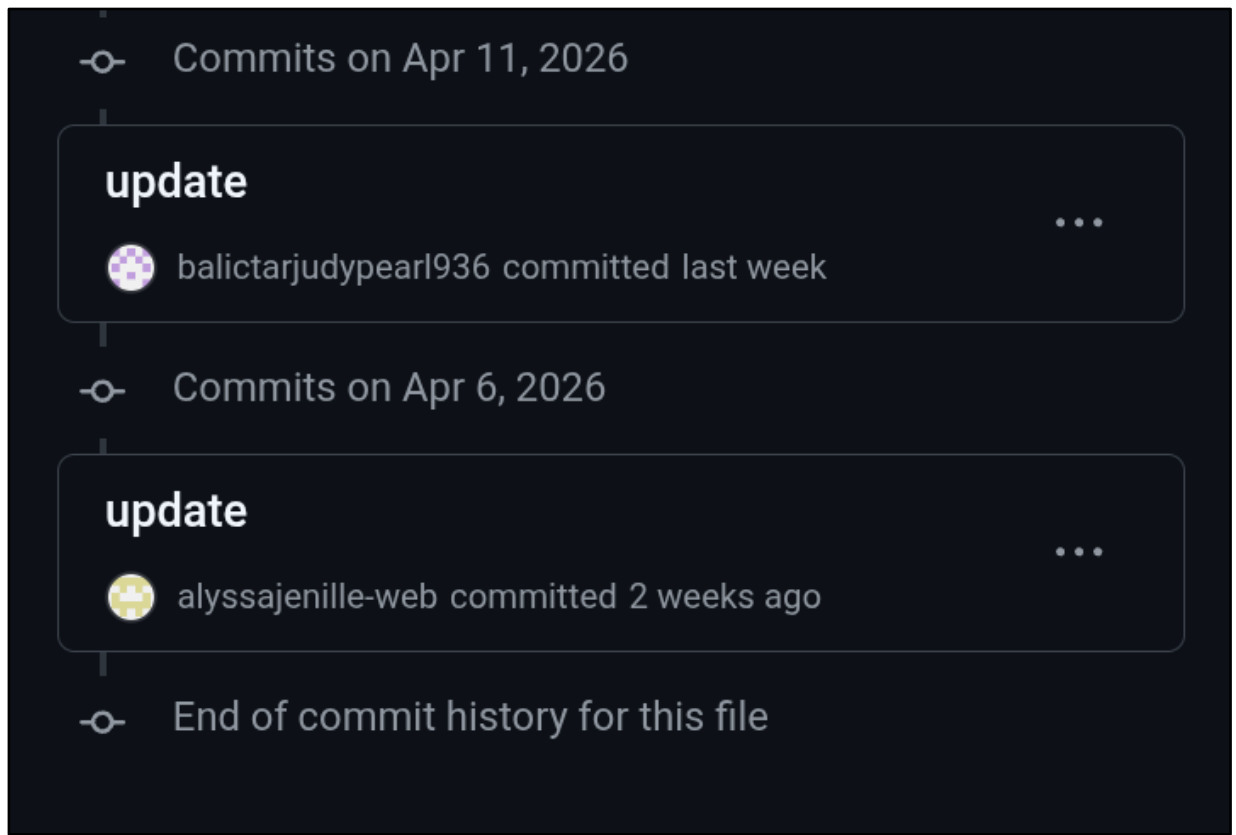

The Teacher Dashboard is designed for teacher users. It allows them to manage or view system data related to their role. This page supports the “Manage System” or “View Dashboard” use case for teachers.

II. Screenshot of GitHub folder structure

The frontend folder contains all HTML pages developed for the system, including login, register, dashboard, and profile pages. This structure ensures organized and modular frontend development.

III. GitHub commits

The commit history shows the progress of frontend development. Each commit reflects updates made to the HTML pages and ensures proper version control of the project.
